April 13, 2021

Attention, Heidelberg Students,

Based on advice today from Ohio Governor Mike DeWine and officials at the Ohio Department of Health, the Stoner Health and Counseling Center has canceled this afternoon’s scheduled COVID-19 vaccination clinic.

The governor’s advice is in response to a joint recommendation from the Centers for Disease Control and Prevention and the Food and Drug Administration to temporarily pause using the Johnson & Johnson vaccine following extremely rare blood-clotting events of six people in the U.S. (out of nearly 7 million J&J vaccines administered) after receiving the vaccine. These cases are currently under review.

During vaccination clinics on campus last week and Monday, Heidelberg vaccinated a total of 310 students, staff and faculty and family members, using the Johnson & Johnson vaccine.

We will provide additional information about future vaccination clinics pending guidance from health officials.

Questions or concerns? Call Stoner Health and Counseling Center at 419-448-2041 and a staff member will be happy to speak with you.

Sincerely,

Dr. Chris Abrams
Dean of Student Affairs

Janelle Baldosser, CNP
Director of Stoner Health and Counseling Center
